RE:

Application Ser. No.10/666,039

Applicant: FALLDIEN, Laurier

Filed: 09/22/2003

Title: ORAL RINSE

Sep 17, 2004

DECLARATION

I, Laurier Falldien, the named inventor of the subject Application, a Canadian citizen, residing in Sudbury, Ontario, Canada, hereby Declare and state, that:

1. I attended Laurentian University in Sudbury, Ontario in 1991-1993, studying chemistry and biology in the biology major course. As a consequence, this gave me a sound knowledge of formula compilation, and of substance interaction with the human body.
2. At that time, in 1993 I owned and operated a studio business providing body piercings, and I became experienced in the normal healing sequences associated with the aftermath of such piercings.
3. I became dissatisfied with the performance of the currently available aftercare products for piercings, that were in use at the time, and decided to develop a more effective piercing treatment.
4. As a consequence, I did additional research on natural healing, and compiled a list of potential ingredients that I thought might be integrated into a product to promote natural healing. This list of potential ingredients was submitted to the Biology

BEST AVAILABLE COPY

7/14

Department of Mercyhurst College, Erie, Pennsylvania, and confirmatory testing was carried out in the Fall of 2001, under the supervision of Dr L. Gauriloff, Associate Professor of Biology.

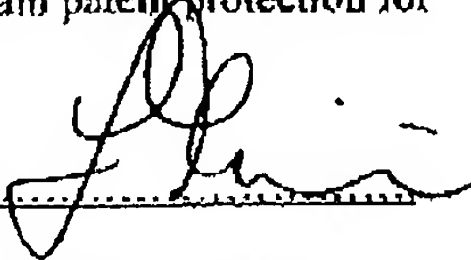

5. The ingredients were tested for anti-bacterial effectiveness; blood coagulation potential; anti-inflammatory effects; epi- and endodermal irritabilities; lubrication potential; smell and taste characteristics; and reactive effects on typical body-piercing metals used in piercing artifacts.
6. Based upon the reported test results, I developed an oral rinse formulation; however it was found to be unduly expensive, and one ingredient was eliminated, in a revised oral rinse formulation. The revised formulation and its predecessor were developed solely for aftercare use with tongue and lip piercings.
7. This revised rinse formulation was submitted to the G.A.P. Environmental Services laboratory in London, Ontario, for evaluation.
8. The evaluation results were extremely promising, and production of the revised oral rinse formulation was started.
9. Several bottles of the revised oral rinse formulation were sold to clients of my Sudbury studio. Subsequently I received reports from a number of those clients that the piercing rinse revised formulation appeared to be effective in alleviating cold sores, sore throats, chancre sores, and even swollen gums.
10. After receiving several such reports, I reported these findings to Dr T. Witzu, D.D.S. a very experienced dental surgeon, doing business at his practice in the near locality.
11. Dr Witzu carried out a documented study, using my revised piercing rinse formulation on friends of his who suffered from cold sores. Dr Witzu reported that he

8/14

was amazed at the effectiveness of my piercing formulation in the treatment of cold sores. A letter from Dr Witsu, D.D.S. is enclosed herewith.

12. As a consequence of Dr Witsu's findings I decided to obtain patent protection for my revised formulation.

Signed at Sudbury, Ontario, this 17th day of September, 2004

D.W. Eggins,
Patent Agent,
18 Downsview Dr.,
Barrie, ON. L4M 4P6

Dear Sir,

The purpose of this letter is to verify my participation on the H.O.P. study. I have also provided you with the results that I have obtained.

Enclosed please find the graph that correlates our findings. As you are aware a 7.00 score is significant; as you can see our results scored significantly higher: (9.87 9.91 9.93 and 9.92).

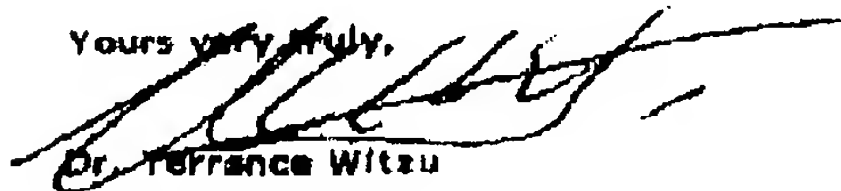

During my one and a half year investigation I have observed significant verification that H.O.P. eradicates the herpes virus, the canker sore virus, fungal infections and various bacterial infections.

I have conducted this research in my own practice and I have been extremely surprised and gratified by the excellent results that I have obtained.

Enclosed please find the list of testimonials.

Should you have any questions please do not hesitate to contact me.

Yours very truly,

Dr. Terrance Witzu

Questionnaire Template

Re: Cold Sore Cure Evaluation

(1) HOP was much more effective than any other treatment I have ever tried for my herpes/cold sore lesions in the past:
 Strongly Disagree _____ Strongly Agree _____

(2) My herpes/cold sore lesions disappeared much more quickly on HOP than other treatments I have tried:
 Strongly Disagree _____ Strongly Agree _____

(3) The size of my herpes lesions was dramatically reduced when I used HOP in comparison to any other treatments that I have ever tried
 Strongly Disagree _____ Strongly Agree _____

(4) My herpes/cold sore lesions were much less painful, when I used HOP as compared to any other treatment I have tried
 Strongly Disagree _____ Strongly Agree _____

SUMMARIZATION OF RESPONSES OF 34 SUBJECTS TO 4-QUESTION TEMPLATE

TEMPLATE

1) HOP was much more effective than any other treatment I have ever tried for my herpes/cold sore lesions in the past:

Strongly Disagree (SCORE 1) Strongly Agree (SCORE 10)

2) My herpes/cold sore lesions disappeared much more quickly on HOP than other treatments I have tried.
Strongly Disagree..... Strongly Agree

3) The size of my herpes lesions was dramatically reduced when I used HOP in comparison to any other treatment that I have ever tried.

Strongly Disagree..... Strongly Agree

4) My herpes/cold sore lesions were much less painful, when I used HOP as compared to any other treatment I have tried....

Strongly Disagree..... Strongly Agree
